

Prajith Selvaraj

QA Automation Engineer | Python | Playwright | API Testing

Brisbane, QLD, Australia | +61 406858741 | sprajith18@gmail.com | linkedin.com/in/prajithS25

Full Working Rights in Australia: MATES - Subclass 403 visa

PROFESSIONAL SUMMARY

QA Automation Engineer with hands-on experience designing and maintaining **Python-based automation frameworks** for web and Windows applications using **Playwright, Pytest, Selenium and Pywinauto**. Skilled in UI, API, functional, regression, integration and end-to-end testing, with experience in REST API automation, SQL validation, CI/CD, POM and reusable automation libraries.

Experienced in building automation frameworks from scratch and integrating test execution with **Jenkins and Bamboo**. Automated **400+ test cases**, achieving approximately **60% automation coverage**, improving regression efficiency and supporting reliable software releases through strong Agile, risk-based testing and cross-functional collaboration.

KEY SKILLS

- **Languages:** Python, Typescript
- **Automation:** Playwright, Pytest, Selenium, Pywinauto
- **AI Testing:** AI Model Testing, Computer Vision, Model Output Evaluation
- **API & Database:** REST API, Python Requests, Postman, JSON, SQL, SQLite
- **Testing:** Functional, Non-Functional, Regression, Integration, E2E, Exploratory, Test Planning, Defect Management
- **CI/CD & Tools:** Jenkins, Bamboo, Git, Jira, Zephyr, Confluence
- **Methodologies:** Agile / Scrum, SDLC
- **Professional:** Client & Stakeholder Engagement, Team Collaboration, Requirement Discussions, Defect Triage, Strong Written & Verbal Communication

Professional Experience

Automation Test Engineer (CL2-I)

Samsung Electro-Mechanics | Bengaluru, India

Jan 2024 -July 2026

- Designed, developed and maintained Python-based automation frameworks from scratch using **Playwright, Pytest, Selenium and Pywinauto** for **web** and **Windows (WPF) applications** supporting **AI-driven** quality inspection and factory automation.
- Automated 400+ functional, NF, regression and end-to-end test cases, achieving approximately 60% automation coverage and reducing regression execution time.
- Developed reusable automation libraries for UI workflows, desktop automation, API validation and Pytest reporting, improving framework scalability, maintainability and test reusability.
- Developed reusable automation libraries for critical business workflows, UI interactions, desktop automation, and Pytest reporting, improving framework scalability, maintainability, and script reusability.
- Designed and automated REST API test suites using Python Requests and Postman, validating HTTP methods, status codes, JSON responses, business logic and backend services.
- Integrated automated test suites with **Jenkins** and **Bamboo CI/CD** pipelines, supporting scheduled regression execution, continuous testing and faster feedback on software changes.
- Performed SQL/SQLite database validation using SQL queries, backend data verification, data reconciliation, and

negative testing to ensure application behaviour, data integrity, and system reliability.

- Validated AI/computer vision models for fire, smoke, person detection, Cart detection, anomaly detection, training workflows, and classification by verifying datasets, frame-level predictions, and model accuracy.
- Collaborated with customers, developers, QA teams and international stakeholders to clarify requirements, demonstrate features, investigate defects, and deliver successful Agile sprint releases.
- Performed defect triage, log analysis and root-cause investigation, working with development and QA teams to improve application stability and release quality.

PROJECTS

- **Centralized Monitoring Platform (CMP)** – Performed functional, UI, API, backend, and **AI model testing**, validating computer vision detection and classification results for events such as **fire, smoke, and person detection**, ensuring reliable and accurate system behaviour.
- **ADAMS (Anomaly Detection & Classification System)** – Tested Windows (WPF) and web-based applications supporting AI model training, anomaly detection, classification workflows, schedule management, and result validation for quality inspection and factory automation.
- **AutoCraft** – Developed an internal Playwright and Pytest automation utility to generate reusable automation scripts from recorded user interactions, improving automation development efficiency.

EDUCATION

Bachelor of Technology – Computer and Communication Engineering

Amrita School of Engineering, Coimbatore, Tamil Nadu, India

CERTIFICATIONS

- ISTQB Certified Tester – Foundational Level (CTFL), 2026
- CCNAv7: Switching, Routing and Wireless Essentials – Cisco (Online), 2023
- CCNAv7: Introduction to Networks – Cisco (Online), 2023
